

MechanicalSoup

A Python library for automating website interaction.

Welcome to MechanicalSoup's documentation!

A Python library for automating interaction with websites. MechanicalSoup automatically stores and sends cookies, follows redirects, and can follow links and submit forms. It doesn't do Javascript.

MechanicalSoup was created by [M Hickford](#), who was a fond user of the [Mechanize](#) library. Unfortunately, Mechanize is [incompatible with Python 3](#) and its development stalled for several years. MechanicalSoup provides a similar API, built on Python giants [Requests](#) (for http sessions) and [BeautifulSoup](#) (for document navigation). Since 2017 it is a project actively maintained by a small team including [@hemberger](#) and [@moy](#).

Contents:

- [Introduction](#)
 - [Installation](#)
- [MechanicalSoup tutorial](#)

- [First contact, step by step](#)
 - [A more complete example: logging-in into GitHub](#)
- [The mechanicalsoup package: API documentation](#)
 - [StatefulBrowser](#)
 - [Browser](#)
 - [Form](#)
 - [Exceptions](#)
- [Frequently Asked Questions](#)
 - [When to use MechanicalSoup?](#)
 - [How do I get debug information/logs](#)
 - [Should I use Browser or StatefulBrowser?](#)
 - [How does MechanicalSoup compare to the alternatives?](#)
 - [Form submission has no effect or fails](#)
 - [My form doesn't have a unique submit name. What can I do?](#)
 - ["No parser was explicitly specified"](#)
 - ["ReferenceError: weakly-referenced object no longer exists"](#)
- [External Resources](#)
 - [External libraries](#)
 - [MechanicalSoup on the web](#)
 - [Projects using MechanicalSoup](#)
- [Release Notes](#)
 - [Version 1.3](#)
 - [Version 1.2](#)
 - [Version 1.1](#)
 - [Version 1.0](#)
 - [Version 0.12](#)
 - [Version 0.11](#)
 - [Version 0.10](#)
 - [Version 0.9](#)
 - [Version 0.8](#)
 - [Version 0.7](#)
